

PROJECT DESCRIPTION

Overview

The proposed track upgrades focus on enhancing accessibility and connectivity in the area. By improving existing pathways and establishing new connections, this initiative aims to create a more integrated network of tracks and creates a link between Beecroft Bushwalk the Great North Walk (GNW).

Proposal

The proposed track upgrade consists of four key elements:

- Improving the existing track at Castle Howard Rd by adding a boardwalk for better accessibility in wet areas,
- New track connection to Lyne Rd Reserve,
- New track connection to Beecroft Rd around the vehicle safety barrier.
- New wayfinding signage will be installed to compliment the track upgrade, assist navigation, and create connectivity with other bushwalks such as Lane Cove Valley Walk (LCVW), GNW and Beecroft Bushwalk.
